Cesar Luis Garrett, born in 1945, acted for more than 30 years in the areas of computer science and information systems, covering the use of large computers, mini and micro-computer systems, highlighting:

Schedule; Conversion and migration; Analysis and development; Administration of PD facilities; Management; Planning; Administration; Audit and systems consulting; Training in data processing; Office automation;

He participated in various training courses in Data Processing in IBM, Siemens-AG, Digital Equipment and Cobra Computers, also actively participated in information courses and professional updating.

As an instructor he acted in several courses, teaching assembler, COBOL, DCF, EPS, CMS; Ministered basic training courses in PD for beginners and executives; He addressed the work of the Technical Audit Seminar in Data Processing by Brazil's Managment Center; carried out various lectures on systems development; Structured analysis; Strategic planning; Electronic document processing. He promoted several meetings "Brain-Storm" for Arthur Lundgren SA.

Provided systems consulting services to the following companies: Casa Coelho Corretora de Cambio, Organization Drugs Glycerério, Datacred Data Processing, Microsiga, Borghoff, João Strong Engineering, Interdata, Koby Micrograph and SMD - Distributed multi-timely systems.

He maintained a bond Employment with the following companies: Cosipa, Lundgren SA (SP), Siemens AG, South America, Xerox of Brazil, Sotreq, Cobra Computers and Arthur Lundgren fabrics, and in this last, it occupied the position of Systems Manager of 1984 1990, and were under its responsibility the information center departments, database, systems development and organization and methods.

Its Hardware Experience and Operating Systems: IBM / 360, IBM / 370, IBM / 43xx, IBM / 3090, ESC Siemens (Unisys), Digital PDP 11/70, Digital 11/34, COBRA Computers (Minis and Micro), Micro -Computers, Sun and Risk Platforms, CICS, VM, DOS / vs, CMS, Adabas, SQL

Development, Conversion and Maintenance of Systems Programming in: COBOL, Assembler, RPG II, Fortran, Dibol, DecForm, Basic Plus, Tall II, Mumps, Ltd, Exec, Rex, SQL, Natural, DCF, FCS, Clipper, Visual Basic and others.

As of 1990, his work returned to the consulting in "Document Managment", acting on the integration of technologies (usually client / server) and organization, covering the study of the information flow of organizations and implementation of Office Automation and Groupware solutions such as: file, electronic mail, corporate agenda, addresses, search, enterprise and workflow documentation registration with the use of Internet and intranet communication networks.

In the area of software Sales, it was the representative in Brazil of the Portuguese SMD in the Office-Automation segment, having extensive experience in the implementation of archiving systems and electronic document recovery made through workstations (client), enabling integration with The existing hardware / software and in use in the organization, with the use of the Internet and intranet.
